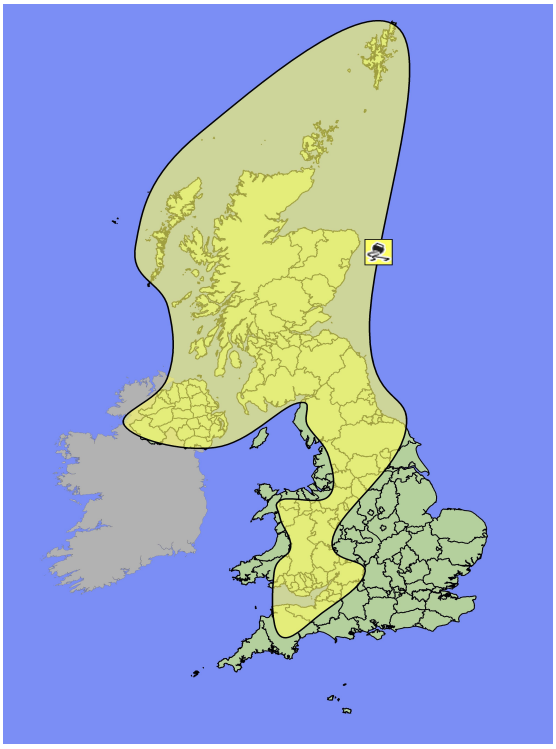
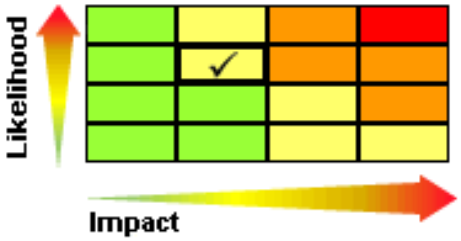
National Severe Weather Warning Service





Chief Forecasters Assessment
The cold, showery air mass will remain over the UK throughout Thursday night and Friday, showers falling as an awkward mix of rain, sleet and snow. Whilst snow will fall mainly on high ground, surfaces at all levels wetted by rain and sleet will freeze at times to give icy conditions.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **20:00 on Thu, 26th Jan 2012** until **11:00 on Fri, 27th Jan 2012**

Icy stretches are expected to form on untreated surfaces, especially in places affected by showers. The showers will fall as snow above about 250 metres, but there may be temporary slush deposits to lower levels.
The public should be aware of possible travel disruption.
